- Transport
Key messages for Primary Care

- Non-complex/low risk access through the support lines.
- Where IAPT is appropriate it will be offered via support line routes.
- People experiencing emotional crisis can also contact support lines

**Complex/High risk cases should still be referred through existing single points of access**

- In the majority of cases contact and intervention will be via phone or online
- Where patients are under secondary care they will have been contacted by their care team to confirm arrangements for ongoing care

- Please note that Crisis Café’s and PAUSE Drop-in have been closed but the same support can be accessed via the support lines
